

CCRM-002 MANUAL HANDLING ASSESSMENT

Date Completed:	5 March 2025	Environment:	Office Space / Common Areas / External Areas
Re-Assessment Due*:	Two years from above date.	Assessment Completed By:	H&S Manager
Employee Consultation and Involvement	Reynel Realpe	Employee Consultation and Involvement	Jhon Otalvaro

SCOPE: To assess, using the principles of the MAC tool, the manual handling risks present. **Key:** G=low; A=medium; R=high 1=low; 2=medium; 3=high

MANUAL HANDLING ASSESSMENT TOOL								
TASK	Risk Factors	Colour Band			Numerical Score			Controls/description
		LIFT	CARRY	TEAM	LIFT	CARRY	TEAM	
General cleaning activities, floor cleaning, and waste removal.	Load weight/frequency	G	G	G	0	0	0	Minimal weights all less than 5kg and limited repetitiveness. Please disinfect the load before handling it use biocides or sanitizer wipes
	Hand distance from lower back	A	G	-	3	0	-	Materials loaded into/unloaded
	Vertical lift region	A		-	1		-	Below knee in some occasions
	Trunk twist/sideways bending Asymmetrical trunk/load	G	G	-	0	0	-	No restrictions or restricted spaces where cleaners are required to manually hand materials
	Postural constraints	G	G	G	0	0	0	Small/restricted areas – limited risk
	Grip on load	G	G	G	0	0	0	Supplies and materials purchased in small amounts to minimise handling lifting requirements – chemicals, tools and equipment
	Floor surface	R	R	R	2	2	2	Floor surface not guaranteed or standard – assessment uses worst case of steep, contaminated or wet flooring
	Other environmental factors	A	A	-	1	1	-	Maybe required to climb steps within a building or access through corridors
	Carry distance		G			0		Limited carry distance from stores to area
	Obstacles en route		A			2		Maybe restricted access due to client materials and other persons within the area. Look out for workers or people breathing heavily and sweating, workers who complain of excessive fatigue,
	Communication/coordination			-			-	Generally single person lifting (lightweight cleaning equipment and substances)
	Other factors	G	G	G	0	0	0	All cleaners trained in manual handling techniques and use of PPE
	Total rating	-	-	-	7	5	2	Operations require ongoing monitoring and review as defined within IMS
