### Safe Use of Knives/ Sharp Objects in the Kitchen

#### Equipment:

Glove

Non-slippery shoes

#### Health and Safety:

- Use a knife suitable for the task and for the food you are cutting. Try to choose the smallest all the time.
- If working in pairs to pass a knife to someone else, you should place it down (on a clean surface) and allow the other person to pick it up.
- Avoid placing knives near the edge of a countertop.
- When putting knives into the dishwasher make sure cutting edge is upside down.
- Store knives securely after use, exp in a scabbard or container
- When facing overflow sinks with zero visibility. Take extra-care
- Never leave Knives in a sink full of water
- DO NOT CARRY KNIVES. IF YOU HAVE TO make sure the cutting edge is pointed down and angled slightly away from your body.
- Let a falling knife fall. Do not try to catch it.
- DO NOT ENGAGE in horseplay with a knife
- Avoid the temptation to use your knife to get into cans or TOUGH PACKAGING
- Make sure the kitchen floor surface is even and free from obstacles
- If anybody injured with a knife, immediately apply firm pressure to the wound with a pad or clean cloth and ASK FOR HELP from security to call the first aider.

#### Method:

- Wear personal protective equipment
- Train employees in the safe use of knives and safe working practices when sharpening them
- Cut on a stable surface preferably chopping board
- Hold the knife properly make sure you have a firm grip on it to ensure it doesn't slip.
- DO NOT APPLY too much pressure to knife

#### Dishwasher Use

#### Equipment:

- Caution Signs
- Green cloths
- Cleaner/ Scoring pad

#### Health and Safety:

- Trained staff only on the correct usage and procedures Phase 2 Induction
- Wear PPF
- Follow COSHH instructions on safe use of chemicals
- Do not put sharp objects like knives into the dishwasher as cutting edge is upside
- Follow user manual instruction on how to clean the machine
- Report any faults immediately.
- Train staff in correct usage & procedures from the manufacture's user manual book

#### METHOD DETERGENT

- Become familiar with the kind of product you are handling, please refer to COSHH book or manufacturer instructions
- 2. Put on personal protective equipment.
- 3. Place warning signs
- 4. Ventilate the area, if possible.
- 5. Open the dishwasher and check for the type of connection on the dispenser
- 6. Place the new bottle on the floor "Ground Level"
- KEEP THE BOTLE VERTICAL AT ALL TIMES.
- 8. Do not place any full or empty container on the countertop of the kitchen.

Dishwasher Salt

Dishwasher Rinse Aid

- 9. Clean equipment and check for safety
- 10. Wash buckets wipe out and store
- 11. Return e Washcloths and allow drying.
- 12. Returned equipment, materials and warning signs to store

METHOD	CARE OF EQUIPMENT
Catering for Meetings and Events	13. Clean equipment and check for

Before starting task, ensure hob is switched off from the main fuse  Before starting task, ensure hob is switched off from the main fuse	
• Where possible and sensible, staff use tools (cutlery, tongs scoops etc) to handle food rather than hands	
Where food handling cannot be avoided, hands are rinsed promptly before starting and after finishing the task.	
Use clean equipment and maintain good personal hygiene when handling food	
Work in teams if possible if load is heavy or bulky with necessary PPE	
<ul> <li>Use heat resistant gloves if necessary when handling hot liquid in large amounts</li> </ul>	
Always isolate (switch off from power supply) machinery before carrying out maintenance or cleaning work.	
Do not store chemicals near food preparation areas	
Follow COSHH instructions on safe use of chemicals when cleaning work surfaces	
Report any faults immediately.	
<u>Train staff in correct usage &amp; procedures from the manufacture's user manual book</u>	
Method:	
After receiving instructions from your manager on the requirements and specifications of housekeeping	
Restock tea coffee as required Restock dispensers	
Restock disperisers  Restock milk (work in pairs if the load is too heavy)	
Prepare catering for events and meetings as required and instructed by client	

METHOD	CARE OF EQUIPMENT
IVIL II IOD	

#### Cleaning induction hobs / electric hobs

#### Equipment:

- Caution Signs
- Green cloths

#### Health and Safety:

- Always maintain 2 m Social Distancing if working in pairs
- Refer to site control measures regarding COVID-19 Response
- Trained staff only on the correct usage and procedures Phase 2 Induction
- Wear PPF
- Always isolate (switch off from power supply) machinery before carrying out maintenance or cleaning work.
- Do not clean if hob still hot
- Clean the hob by using only a damp microfibre cloth
- Report any faults immediately.
- Train staff in correct usage & procedures from the manufacture's user manual book

#### Method:

After receiving instructions from your manager on the requirements and specifications

- -Clean the hob using a green microfibre cloth
- -Wipe hob with a dry microfibre cloth

 Ensure power suppy is switched off before carrying out cleaning

- 17. Clean equipment and check for safety
- 18. Wash buckets wipe out and store
- 19. Return e Washcloths and allow drying.
- 20. Returned equipment, materials and warning signs to store

### STEP 7 - RISK ASSESSMENT (likelihood X Severity = Risk)

CATEGORY	HAZARD	POTENTIAL HARM	LIKELIH OOD	Severity	Risk before Controls	Risk After Controls	COMMENTS
Cleaning of Kitchen and food area.	Electricity	Burns / Shock/	2	3	6	3	Staff instructed not to touch any light switches with wet hands.
Kitchen and food area.	Contact with steam, hot water, hot oil and hot surfaces	Scalding or burns injuries	3	4	12	6	Staff Trained on the risk of hot liquids Use of heat resistants gloves where neccesary Ensure hobs are turned off or disconnected when not in use Display 'hot water' signs at sinks Staff training for all staff on first aid procedures, should it be needed. Staff advised to wear long sleeve

Kitchen and food area.	Food Handling	Frequent hand washing can cause skin damage. Some foods can cause some staff to develop skin allergies	3	4	12	4	Where possible and sensible, staff use tools (cutlery, tongs scoops etc) to handle food rather than hands. Food grade, single- use, non-latex gloves are used for tasks that can cause skin problems Where handling cannot be avoided, hands are rinsed promptly after finishing the task. Staff reminded to thoroughly dry hands after washing.
Kitchen and food area.	Food Safety	Bacterial growth or further contaminated by micro-organisms, chemicals etc.	3	3	9	4	Staff training Store at safe temperatures Cover or wrap foods Check Storage instruction Check expiry date on packinging Efective cleaning routine Good personal hygiene
Cleaning of Kitchen and food area.	Slips, trips & falls	Broken bones/bruises/cuts	4	3	12	6	Operatives trained in these operations. Awareness of environment and other people's actions. Tool box programme in place Staff instructed to report hazards to area managers. Staff instructed to wear sensible shoes. Good housekeeping – work areas kept tidy, goods stored suitably etc. Kitchen equipment maintained to prevent leaks onto floor. Equipment faults leading to leaks quickly reported to manager.
Cleaning of Kitchen and food area.	Exposure to hazardous substances	Inhalation, skin contact, eye contact / irritation, ingestion, vomiting, possible intoxication	4	2	8	2	Training, induction and Toolbox progarmme in place Disposable gloves and aprons provided See COSHH assessments
Cleaning of Kitchen and food area.	Sharp objects	Cuts / Injuriy	4	4	16	4	Operatives trained in these operations. Staff instructed to report hazards to area managers. Training, induction and Toolbox progarmme in place PPE provided Competent supervision and monitoring When handling Knife always keep blade and /or sharp ends away from the body  If passing a knife to another person never give the knife directly to the other person.  Place the knife on a flat surface such a table or conutertop and alow the other person to take the knife from that surface.

Cleaning of Kitchen and food area.	Contact with body fluids	Biohazard risk / contamiation / infection	3	4	12	4	Training, induction and Toolbox progarmme in place Reporting of near missess and dangerous occurrence Competent supervision and monitoring Disposable gloves and aprons provided Biohazrd Fluids and sharp risk assessment and training in place
Cleaning of Kitchen and food area.	Contact with body fluids due to using contaminated cloths and poor personal hygiene	Biohazard risk / contamiation / infection	4	4	16	4	Training, induction and Toolbox progarmme in place Reporting of near missess and dangerous occurrence Competent supervision and monitoring Disposable gloves and aprons provided Biohazrd Fluids and sharp risk assessment and training in place Forensic cleaning technique is in place Colour coding system for cloths & buckets are in place GBAC trained supervisor Operatives are aware and informed regarding personal hygiene rules on sites
Cleaning of Kitchen and food area.	Manual Handling	Musculoskeletal injury (e.g. Back, arms, shoulders injuries)	3	3	9	3	Staff trained in safe method of work Training and site induction in place ToolBox programme in place
Cleaning and Descaling of Coffee machines	Manual Handling / Exposure to hazardous substances	Burns, electrocution, scalds and burns and fire	3	3	9	3	Trained staff only on the correct usage and proceedures – Phase 2 Induction Fault reporting in place and follow by all staff Ensure area around you is celar of obstruction COSHH training must be completeed before using chemicals and PPE must be worn. Refer to The User Instruction Manual for Descaling process or contact the client Read the COSHH of the descaling product before performing the descailing process. If in doubt contact immedialtely your supervisor or Manager
OVERALL RISK RATING BEFORE CONTROL: 11			Very Low	Low	Medium	High	COMMENTS
					✓		
OVERALL RISK RATING AFTER CONTROL: 3.9			Very Low	Low	Medium	High
